# **Economic Indicators**

## Inflation in India (%)

Consumer Price Index decreased to 18 months low, 4.7% in Apr'23 from 5.66% in Mar'23, largely due to base effect and decrease in prices of vegetables, oils, meat and fish, and lowered inflation of other food items. Retail inflation is below the Reserve Bank of India's upper tolerance level of 6%. Wholesale Price Index (WPI) cools down to 34 months low of -0.92% in Apr'23 from 1.34% in Mar'23, primarily contributed by fall in the prices of manufactured items and fuel and power. This is the 11th straight month of decline in WPI-based inflation.

#### Indian Business Indicators - Purchasing Managers' Index (PMI)

S&P Global India Manufacturing Purchasing Managers' Index (PMI) grew to 31 months high of 58.7 in May'23 from 57.2 in Apr'23 attributed to robust and quicker expansion in new orders. The sector also benefitted from relatively mild price pressures, better international sales and improving supply-chain conditions in May'23. PMI Services marginally declined to 61.2 in May'23 from 62 in Apr'23 supported by the sustained growth of new business in the face of positive demand trends. The reading remains in the expansion zone as a print above 50 means expansion while a score below 50 denotes contraction.

# Equity Markets - India & US

Bellwether indices, Nifty 50 and S&P BSE Sensex increased significantly during the month by 2.60% and 2.47% respectively on m-o-m basis majorly supported by strong corporate earnings season as well as RBI pausing consecutive rate hikes. Domestic retail inflation is below the Reserve Bank of India's upper tolerance level of 6% in Apr'23 also added to positive sentiments in the markets. Goods and Services Tax (GST) collection stood at ₹ 1.57 lakh crore in May'23, highest ever, which is 12% more than the corresponding period of last year. Foreign Institutional Investors (FIIs) were net buyers in Indian equities to the tune of ₹ 43,838.15 crores this month. Dow Jones increased by-3.49% from previous month.

#### India GDP Growth Rate

India's GDP growth hit it out of the park with 6.06% for Q4 FY23 vs 4.46% for Q3 FY23. Real GDP growth for the full year FY23 (Apr'22 to Mar'23) came in at 7.2% y-o-y. This GDP growth came in much higher than expected as Agriculture growth was extremely strong, growing 5.5% y-o-y. The disruption caused by the unseasonal rains at end-March may show up in the next quarter. Manufacturing grew faster than the industrial production data. Construction activity rose quickly. This also links up well with the impressive rise in fixed investment. We attribute much of this to central and state government capex picking up in the March quarter. Finally, exports were buoyant, led more by services than goods. In fact, the percentage point contribution of net exports to GDP growth came in at a positive 1.4ppts.

Note : The data/statistics are given to explain general market trends, it should not be construed as any research report/research recommendation. The sector(s) mentioned are for the purpose of understanding only and the Fund may or may not have any future position in these sector(s).

#### Source: Bloomberg

# Index of Industrial Production (%)

Index of Industrial Production (IIP) declined to 5 months low of 1.1% in Mar'23 from 5.6% in Feb'23 primarily owing to poor performance of the power and manufacturing sectors. Power sector declined by 1.6% whereas manufacturing sector and mining sector grew by 0.5% and 6.8% respectively.

#### USD INR හ Brent Crude Movement

Brent crude oil stood at ~US\$ 72.66 as concerns over turmoil in the international banking sector and uncertainty over interest rates hit the demand outlook of the commodity across the world. The Rupee closed the month on 82.73 against Greenback as on May'23.

# Interest Rate Movement (%) - India & US

Yield on the 10-Year benchmark paper decreased slightly, closing at 6.99% on May'23 vs 7.119% on Apr'23 following Reserve Bank of India's (RBI) kept policy rates on hold in the first monetary policy review of FY24. Yields fell further after the RBI Governor said that countries holding excess rupees in their vostro accounts in India can invest the surplus in government securities and Treasury bills. U.S. Federal Reserve hinted at ending the rate hike cycle soon which also led to declined in bond yields. 10-year U.S. Treasury bond closed higher at 3.64% on May'23 vs 3.422% on Apr'23.

# **Equity Market Review**

Mr. Shridatta Bhandwaldar Head - Equities

#### Equity Market Update

- In the month of May'23, equity markets surged significantly with Nifty 50 rising by 2.60% on m-o-m basis fuelled by upbeat corporate earning numbers for the quarter ended Mar 2023 and favourable domestic macroeconomic data and strong buying by foreign institutional investors for the month ended May'23.
- ▶ Foreign Institutional Investors (FIIs) were net buyers in Indian equities to the tune of 1 43,838.15 crores
- Goods and Services Tax (GST) shows highest ever collection of 1.57 lakh crore for May'23, which is 12% more than the corresponding period of last year and this points towards the growing trajectory of the Indian economy.
- Though during the month, gains were neutralized as market participants preferred to book profits. Government Data showed that the India's Eight Core Industries growth moderated to 6-month low of 3.5% in Apr'23.
- Though at the end of the month, markets were resilient with the help from cooling off global inflationary pressures and buoyancy in domestic macro indicators. Climate expert also suggest the 2023 monsoon may be normal. India's economy sees significant growth and merrier-than-estimates as GDP growth is at 6.1% in Q4FY23 compared to 4.4% growth rate witnessed in Q3FY23. Gains were also boosted by a decline in oil prices on the world markets and a reduction in anxiety about the U.S. debt ceiling.
- Globally, US equity markets went south by 3.49% as there was uncertainty over the interest rate outlook and U.S. consumer sentiment and initial jobless claims rose more than expected. European Equity fell after data showed that Germany's economy fell into recession in the first quarter of this year and Bank of England's decision to raise its benchmark interest rate by 25 bps. Asian equity markets closed on a mixed note as fears of a resurgence in China-U.S. trade tension weighed on the market sentiment and concerns over weak domestic demand in China.

Note: The past performance may or may not be sustained in the future. Source: MFI Explorer, ICRA Analytics Ltd.

# **Equity Market Outlook**

Global environment remains complex with persistent inflation at higher level than expected, persistent supply chain challenges and geopolitical re-alignment and its long-term implications for supply chains. Within this complexity, the underlying Inflation seems to be moderating fast (though not visible yet in headline) and energy prices have finally started reacting to global compression in money supply. Expect lower inflation and energy prices in a quarter or two. The Federal Reserve increased its key interest rate by 0.25 percentage points - its 10th hike in 14 months. That pushed its benchmark rate to between 5% and 5.25%, up from near zero in March 2022, although the Fed hinted the rise may be its last one for now. The latest banking crisis could mean Fed might have to pause the interest rates despite near term inflation and see how increases of past year play out on growth and banking system. Combination of slowing growth but yet sticky inflation is an outcome of elevated energy prices and challenged supply chains in China/Energy, which are taking time to correct itself. Geopolitical tensions are taking time to abate and are only getting complex. Given these tensions, supply chains and global trade has become vulnerable to new dimension in 2023, missing till 2022. The banking crisis is being tackled by central bankers through regulatory channels without compromising on inflation fight through interest rate increases. This will mean that the developed world will see growth moderation through FY24, though China might see some improvement due to post covid opening-up of economy.

In our worldview, 1) the Liquidity, 2) Growth and 3) Inflation surfaced post monetary and fiscal expansion in CY20-21 in that order and they will reverse in the same order during CY22-23. We have already witnessed liquidity reversal in the last few quarters (although was forced to reverse due to the banking crisis); growth has started receding lately (Europe is already in recession, US is slowing) and inflation will be the last one to moderate. We have seen an initial downtick in inflation, which will accelerate in our view. Inflation is taking more time than usual to recede given healthy household savings, elevated energy prices, tight labor markets and challenged supply chains in China.

Indian macro remains resilient. CAD has improved significantly and is expected to be within 2% for FY24, with falling commodities and slowing growth. Most domestic macro and micro indicators remain steady. The only worrying aspects domestically are latest consumption slowdown. Given these aspects, the domestic equity market remains focused on earnings. Both key factors, earnings growth and cost of capital (interest rate outlook globally) are neutral to negative for India from near term perspective and thus market will continue to consolidate till we get visibility on earnings upgrades or substantial decline in interest rates (Inflation globally/locally) to change multiples. The cost of capital has peaked and has started witnessing correction – US and India 10 years at 3.5% and 7% respectively- likely to aid valuation multiples. While the earnings are not getting upgraded; they are fairly resilient and seems to be bottoming. Financials, auto, industrials, Telecom, Hospital and Hotels are witnessing a healthy earnings cycle whereas Energy/commodities and IT continues to moderate. India trades at premium to other EMs and thankfully that is correcting with the consolidation in market over last 18months. Indian equity market trades at 19xFY24 earnings – with earnings CAGR of 13-14% over FY23-25E- in a fair valuation zone from near term perspective. We will watch out for one year forward (Earnings yield – Gsec yield) gap to compress to ~50bps for getting more constructive in near term. This is falling in place it appears to us. **The earnings growth/Valuation expectations context is turning more and more favorable for anyone who has 18-24months view from hereon.** 

Having said this on near term earnings /market context, we believe that Indian economy is in a structural upcycle which will come to fore as global macroeconomic challenges recede over next few quarters. Our belief on domestic economic up-cycle stems from the fact that the enabling factor are in place viz. 1) Corporate and bank balance sheets are in best possible shape to drive capex and credit respectively, 2) Consumer spending remains resilient through cycle given our demographics, 3) Govt is focused on growth through direct investments in budget as well as through reforms like GST(increasing tax to GDP), lower corporate tax and ease of doing business (attracting private capex), PLIs( private capital through incentives for import substitution or export ecosystem creation) and 4) Accentuated benefits to India due to global supply chain re-alignments due to geopolitics. This makes us very constructive on India equities with 3-Syears view.

# **Debt Market Review**

Mr. Avnish Jain

2022-23.

#### Macro Review හ Fixed Income Market Outlook

- Global Economy Update: Macro Backdrop: > The global economy is transfixed in the cross-currents of slowing growth and high inflation, and an uneasy calm prevails in the global financial markets as they await clearer signals from policy authorities on banking regulation and supervision, and contours of deposit insurance.
- Global financial markets staged a recovery from late March as fears of contagion from the recent banking turmoil in the US and Europe receded.

  - Markets, however, remained rangebound in April May as the focus turned to the pace and magnitude of future rate hikes.
     Central banks in the AEs (Advanced Economies) and EMEs (Emerging market economies) have either reduced the magnitude of hikes or paused in their rate hike cycles.
  - > The US FOMC increased its policy rate by 25 basis points on May 3, 2023, and indicated that further actions "- will take into account the cumulative tightening of monetary policy, the lags with which monetary policy affects economic activity and inflation, and economic and financial developments'
  - The Bank of England and the Reserve Bank of Australia raised their policy rates by 25 bps each in May.
    - In its April meeting, the Sveriges Riksbank increased its key rates by 50 basis points while the ECB raised the three key rates by 25 bps in May.
    - Most EME central banks have also pivoted to relatively less aggressive monetary policy actions.
- Emerging market economics (EMEs) appear to be positioned a head of their advanced peers in charting a path of the multiple shocks that characterised the years gone by.
   Risks to global growth in 2023 stem from elevated inflation, tighter financial conditions, in the backdrop of the conflict in Ukraine.
   Indian Economic Growth: Macro Backdrop: In April and May 2023, domestic economic conditions have sustained the quickening of momentum seen in the last quarter of Head - Fixed Income

- Headline inflation eased below 5 per cent in April 2023, for the first time since November 2021.
- Corporate earnings are beating consensus expectations, with banking and financial sectors posting strong revenue performance, aided by robust credit growth.
- In the first quarter of 2023-24, growth is expected to be driven by private consumption, supported by reviving rural demand, and renewed buoyancy in manufacturing on easing of input cost pressures.
- During 2022-23, the year gone by for which a clearer picture now emerges, merchandise exports grew by 6.7 per cent, driven by petroleum products, while non-oil exports declined. Exports of petroleum products were buoyed by the price effect, resulting in a growth of 44.4 per cent in value terms despite a 0.4 per cent fall in volume terms. Merchandise imports fell to a twenty-month low of US\$ 49.9 billion in April 2023, recording a sequential contraction of 16.9 per cent and a y-o-y decline of 14.1 per cent on account of easing commodity
- prices and a fall in demand for discretionary items such as gems and iewellery.
- The index of industrial production (IIP) grew by 5.1 per cent in 2022-23, led by a robust expansion in the production of electricity followed by mining and manufacturing.
- As per the use-based classification, the expansion was led by capital goods, infrastructure goods and primary goods while the growth in consumer durables and non-durables remained subdued at 0.5 per cent each.

The goods and services tax (GST) collections (Centre plus States) in May 2023 stood at INR 1.57 lakh crore and recorded a growth rate of 12 per cent y-o-y

- Inflation: Global: Inflation continued to edge down grudgingly across most economies. In April, the headline CPI inflation (y-o-y) in the US eased marginally to 4.9 per cent (the lowest since April 2021) from 5.0 per cent in March.
- Inflation based on the US personal consumption expenditure (PCE) index also eased to 4.2 per cent in March from 5.1 per cent in February. In the UK, CPI inflation moderated to 10.1 per cent in March from 10.4 per cent in February.

- Japan's CPI (all items less fresh food) inflation remained steady at 3. Je recent in March. In the Euro area, inflation edged up marginally to 7.0 per cent in April 2023 from a 13-month low of 6.9 per cent in March.

#### Source: Bloomberg and OECD

- India: > CPI inflation moderated sharply to 4.7 per cent in April 2023 from 5.7 per cent in March. > The decline in inflation was broad-based across food, fuel, and core (excluding food and fuel) groups, which was also reflected in their falling contribution to overall inflation.
- The fall in headline inflation was on account of the combined impact of monetary policy tightening, supply augmenting measures and a favourable base effect. CPI food inflation (y-o-y) moderated sharply to 4.2 per cent in April 2023 from 5.1 per cent in March on account of a large favourable base effect of around 145 bps, which was more than offset by a positive price momentum of around 55 bps.

#### Trends and Drivers of CPI Inflation:

Bond Yields & Spreads: > US FED hiked rates by 25 bps in May 23 FOMC (Federal Open Market Committee), following a similar hike in Mar/Feb '23, despite banking sector stress, indicating that inflation remains top priority. However, the FOMC has indicated that they would likely pause, though continue to watch inflation trajectory. No rate cuts are envisaged by the FOMC in 2023.

- ECB hiked by 25bps in May, with the Bank of England (BoE) hiking by 25bps in May as well.
- In a surprise move, RBI paused in the first policy of FY2024, keeping rates steady at 6.50%. Markets now expect RBI to remain in pause mode for a rest of 2023. US 10Y rose in May as the brinkmanship over US Debt ceiling rattled markets. With few of FED speakers advocating more rate hikes, market pricing of an early "pivot" has receded, pushing rates higher. India rates continue to ease post RBI April policy surprise as well as sharp drop in inflation. 10Y Gsec yield dropped below the crucial level of 7% and touched a low of 6.94%.
- Overall yield curve dropped lower with flattening bias as long-term rates dropped more on back of RBI's pause. Short term rate drop was limited as expectations of rate easing is still well in the future. Medium to long term corporate spreads remained on lower side in absence of any material increase in supply.
- Outlook: Global: Clobal economy is likely to be marked by slower growth, moderating but elevated inflation, peaking policy rates, and continuing geo-political risks.
- While growth is slowing, labor market in the US remains strong, keeping US FED on its toes.
- Receding risks from US bank failures and the speed at which these were addressed has brought confidence back into markets. Inflation seems to have peaked in major countries, though reasons to cheer may still be far away, as the momentum of drop in inflation has slowed down, belying market expectations of a quick 'nivot" in policy rates.
- US FOMC has indicated a pause in the rate hike cycle while other central banks like ECB and BoE may still have more work to do.
- While rate hikes in major countries seem to have ended, rates may have to remain higher for longer to bring down inflation to mandated levels in the absence of any sharp fall in growth rates.

With the banking crisis addressed and debt ceiling issue behind us, markets will likely be driven by incoming data as policy makers are becoming more data dependent

- Overall rate markets should benefit from softer growth prints, slowing inflation and end of rate hikes in a number of economies.
- For the first construction of though it is likely to slow down to 6%-6.5% in FY2024.
- Inflation downtrend has started, with 1Q FY2024 inflation likely printing well below 5%.
- RBI MPC surprised markets by pausing rate hikes, citing global financial stability concerns and the need to assess the impact of cumulative tightening already delivered in last 1 year.
- We now expect RBI MPC to go for a longish pause and watch the evolving inflation dynamics. RBI MPC may change the stance of policy to "neutral" as inflation is coming down as expected.
- With RBI projecting inflation to be 5.2% for FY2024, it remains above their 4% medium term policy target. Coupled with strong growth numbers, there is no pressure on the RBI to ease any time soon.
- The global rate scenario has turned benign as growth slows in advanced economies and large central banks either indicating a pause or nearing end of hike cycles.
- Markets have rallied post policy, with the curve flattening as longer-term rates drop faster than short term rates
- 10Y GSEC rates has failen below 7%, and the downside may remain limited in absence of any rate easing expectations in the near term.
- Markets are likely to consolidate from here. Market movements may depend on global cues, supply-demand of local bonds in the market, oil price movements and inflation trajectory. 10Y G-SEC may trade in 6.90-7.10% range.

# PRODUCT POSITIONING

Canara Robeco Flexicap Fund is an open ended flexi cap fund and follows a predominantly bottom-up investment approach with a focus on fundamentally sound companies which may deliver capital appreciation over the long-term. The fund also takes Top-down approach to identify sectoral themes based on the available opportunities. The fund is a market agnostic fund and take exposure across large, mid and small cap companies having high conviction ideas. The fund provides a blend of 'Growth' and 'Value' style of investing.

# PRODUCT POSITIONING

Canara Robeco Focused Equity Fund is an open-ended equity scheme which takes a concentrated exposure in not more than 30 high conviction stocks across market capitalisation depending on the growth opportunities. The fund may benefit from the active allocation to the select best ideas with an aim to achieve optimal portfolio diversification across sectors to manage risk. The fund's portfolio focuses on high quality and high growth stocks while remaining market capitalisation agnostic but sensitive to liquidity constraints. Further, the fund strategy intends to have a good combination of 'Leaders' with proven track record across market cycles to provide stability, 'Challengers' with improving market share to provide growth to the portfolio and 'Emerging Themes' or cyclical turnaround beneficiaries.

# PRODUCT POSITIONING

Canara Robeco Value Fund is an open-ended equity scheme which follows a value investment strategy. The fund intends to take exposure into equities and aims to generate long-term capital appreciation from a diversified portfolio in the Indian markets with a higher focus on companies which are trading at a discount to their 'Intrinsic Value'. 'Intrinsic Value' strategy relies on the analytical and behavioural edge to generate investor's alpha and keeps an appropriate 'Margin of Safety'. The fund has a market cap agnostic approach following a mix of bottom up and top down strategy and it aims to benefit over the full investment cycle.

Fund predominantly invests in tri-party repos, overnight reverse repos and fixed income securities/instruments with maturity of one (1) business day. Fund has minimal interest rate and credit risk and tends to ensure a high degree of liquidity in the portfolio. Fund offers an alternative to corporate and individual investors who may want to park their idle funds for short period of time and expecting minimal interest rate and credit risk.

# **PRODUCT POSITIONING**

Canara Robeco Ultra Short Term Fund is an open ended ultra-short term debt scheme which seeks to provide consistent income and liquidity through investments made primarily in money market and debt securities following a low risk strategy. The portfolio duration of the fund tends to be slightly higher than a liquid fund but investments are made in debt instruments in a way that the Macaulay duration of the portfolio is between 3 months and 6 months.

## **PRODUCT POSITIONING**

Canara Robeco Income Fund is an open ended medium term debt scheme investing in debt & money market instruments such that the Macaulay duration of the portfolio is between 4 years –7 years. However, the Portfolio Macaulay duration under anticipated adverse situation may be between 1 year and 7 years. Fund manager takes an active view of the interest rate movements. Based on the interest rate view, the duration of the portfolio will be decided along with the asset allocation pattern between sovereign & corporate bonds. As majority of the portfolio gets invested in high quality debt papers, which provides consistent accrual income to the portfolio.

# **PRODUCT POSITIONING**

Canara Robeco Dynamic Bond Fund intends to invest and trade in G-secs and Corporate Debt by identifying mispriced opportunities & capturing volatility trends. The fund aims at generating Alpha through free-style duration management depending on the interest rate view. At the same time it endeavours to capture accruals in the form of portfolio running yields on highquality debt instruments.

## **FUND INFORMATION**

CATEGORY/TYPE: Banking and PSU Fund - An openended debt scheme predominantly investing in debt instruments of banks, public sector undertakings, public financial institutions and municipal bonds. A relatively high interest rate risk and moderate credit risk.

SCHEME OBJECTIVE: To generate income and/or capital appreciation through a portfolio of high quality debt and money market instruments issued by entities such as Banks, Public Sector Undertakings (PSUs), Public Financial Institutions (PFIs) and Municipal Bonds. However, there is no assurance that the objective of the fund will be realised.

26 CANARA ROBECO

Since 22-August-22 PRODUCT POSITIONING Canara Robeco Banking and PSU Debt Fund would be an "Actively Managed Fund" that aims to capture opportunities in the interest rate cycle and mispricing on the yield curve. The Fund will endeavour to invest in "High Grade Assets" that are either government –backed entities or systemically important private banks/entities. This potentially provides lower credit risk. The fund is suitable for investors who have a "Mediumterm investment horizon" of 3-4years & having relatively "low to medium risk appetite" looking to looking to

invest in high credit quality bonds with good liquidity.

1) Since 01-Oct-21 2) Since 5-July-16 3) Since 7-Oct-13

Canara Robeco Equity Hybrid Fund aims to generating long term capital appreciation through a prudent mix of equity and debt portfolio, making it more suitable for the average investor as it takes away the burden of focusing on asset allocation between equity & debt. The fund invests in a careful blend of select stocks and debt securities which effectively spreads the risk.

\* On face value of ₹ 10. ● For Daily, Weekly & Monthly IDCW history of Canara Robeco Liquid Fund, Canara Robeco Ultra Short Term Fund & Canara Robeco Savings Fund Visit : www.canararobeco.com. ● The IDCW amount is before tax calculation. Past performance may or may not be sustained in the future. Pursuant to payment of IDCW, the NAV of the IDCW option of the scheme would fall to the extent of payout and statutory levy (if applicable).

# HOW TO READ A FACTSHEET

Fund Manager : An employee of the asset management company who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Minimum Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until Maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate a d time to maturity.

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10 – Year Gsec.

Entry Load : A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual find. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the exit load is 1%, the investor will enter the fund at Rs. 101.

Exit Load : Exit load is charged at the time an investor redeems the units of mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1% the investor will receive Rs. 99

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit changes in yield.

Standard Deviation : Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Sharpe Ratio : The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit or risk.

Beta : Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to recent / updated cumulative market value of investments of a scheme managed by the mutual fund.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fun. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness a disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

# **DEFINITIONS**

Total Expense Ratio : Expressed as an annualized percentage, it is the ratio of all the expenses of the fund to the total assets of the fund and includes the fund management fees paid to the asset management company for managing the fund's assets.

Sharp Ratio : The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit or risk.

Beta Ratio: Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.
